## DIFENACOUM PW Block Bait + denatonium benzoate ANTICOAGULANT RODENTICIDE + HUMAN TASTE DETERRENT

### 1. Identification of the substance, its preparation, and the supplying company.

Product Name : DIFENACOUM PW Block Bait.  
Product Code : DPWBB(DB)  
Intended Use : Ready for use rodenticide containing 50 ppm difenacoum  
Supplier : PelGar International Ltd., Peak Centre, Liphook. Hants GU30 7TN UK.  
Telephone & Fax : Tel 44(0) 1428 722 250 Fax 44(0) 1428 722 811

### 2) Composition and information on the ingredients.

Composition : 0.005 % w/w difenacoum, mixed grain and food dye with denatonium benzoate as a water resistant paraffin block

Common Name	Classification	CAS No.	EEC Index No.	% w/w (w/v)
Difenacoum	T+, R28, R48/25	056073-07-5	259-978-4	0.005

### 3) Hazards Identification

Hazard Classification for supply and use - NO SIGNAL WORD REQUIRED

Health Hazards: Unlikely to cause harmful effects under normal conditions of handling and use

### 4) First Aid Measures

Symptoms of poisoning are typical of anticoagulants. In severe cases there may be bruising, haematomas of the joints and blood in the faeces or urine. An antidote, Vitamin K<sub>1</sub> (Phytomenadione BP), should be administered under the direction of a doctor who has access to a hospital laboratory. Doctors should refer to the Industry leaflet. "The Treatment of Anticoagulant Rodenticide Poisoning".

Ingestion : If swallowed, wash out mouth with water, then induce vomiting, if this has not already occurred. **Take victim to hospital immediately and obtain medical advice.** Refer to the Industry leaflet - "The Treatment of Anticoagulant Rodenticide Poisoning", 1988.

Skin Contact : Remove contaminated clothing. Wash exposed areas of skin immediately with water and as soon as possible with soap and water. Contaminated clothing should be washed and dried before re-issue.

Eye Contact : Hold eye(s) open and then irrigate eyes with copious amounts of warm water for at least 10 minutes. Obtain medical advice immediately

Inhalation : Unlikely to present an inhalation hazard unless excessive dust is present. Remove person to fresh air. Obtain medical advice immediately as a precaution

#### Further Medical treatment:

Vitamin K<sub>1</sub> (phytomenadione) is antidotal. Gastric lavage may be effective when performed within 4 hrs of ingestion. In the case of suspected poisoning, determine prothrombin times not less than 18 hrs after consumption. If elevated, administer vitamin K<sub>1</sub> and continue until prothrombin times normalise. Continue determination of prothrombin times for three days after withdrawal of antidote and resume treatment if elevation recurs during that time.
